Meeting Information	Registration
---------------------	--------------

	Name	Affiliation	Membership
✓1	David Groep	Nikhef	Dutchgrid and EGI
✓2	Reimer Karlsen-Masur	DFN-CERT Services GmbH	GridGermany CA
✓3	Willy Weisz	University of Vienna	AustrianGrid CA
✓4	Jules Wolfrat	SARA	DEISA
5	Usman Ahmad Malik	NCP	PK-Grid-CA
✓6	Houssam ABED	HIAST	HIAST CA
✓7	Ghassan SABA	HIAST	HIAST CA
✓8	David Kelsey	STFC-RAL	WLCG RP
✓9	Thijs Kinkhorst	Universiteit van Tilburg / SURFnet	TCS eScience Personal
✓10	Javi Masa	RedIRIS	pkIRISGrid CA
11	David O'Callaghan <i>Remote.</i>	Trinity College Dublin	Grid-Ireland CA
✓12	Jens Jensen	STFC	UK e-Science CA
✓13	Nuno Dias	LIP	LIPCA
✓14	Paweł #32	Wolniewicz	PSCN
✓15	Roberto Cecchini	INFN	INFN CA
✓16	Sergii Stirenko	NTUU KPI	UGRID CA
✓17	Eygene Ryabinkin	RRC "Kurchatov Institute"	RDIG CA
✓18	Eric Yen	APGridPMA and ASGC	ASGCCA
19	Alice de Bignicourt	CNRS	GRID2-FR CA
✓20	Tamas Maray	NIIF/Hungarnet	NIIF CA
21	Lidija Milosavljevic	University of Montenegro	MREN-CA
✓22	Licia Florio	TERENA	TACAR
✓23	Aouaouche El-Maouhab	CERIST	DZ e-Science CA
✓24	Cosmin Nistor	Romanian Space Agency (ROSA)	RomanianGRID CA
✓25	Alexandru Bobe	Romanian Space Agency (ROSA)	RomanianGRID CA
✓26	Onur Temizsoylu	TUBITAK ULAKBIM	TR-Grid CA
✓27	Jean-Christophe Real	BELNET	BEgrid CA
✓28	Christos Triantafyllidis	AUTH/GRNET	HellasGrid CA

+The

Soort

*Remote: Christos K.
 Vladimir Dimitrov*
 Miroslav D.
 David OC.*

*The. live in person
 + Fern N.*

**connected for very long time! S.*

09:30 Intro. Notes by Sales Wolford.

09:50. Eric Yen: AP Quid Pro, Update.

- drop in total resources in October 2010: decommissioning in VN.

- End 2011 AP Quid Pro: 17 Oct 2011 in Sapporo, JP with PRG/HIP.

Onni: why so many host seats for ASGC?

Eric: driven by NTCG services at ASGC → 3000 host's to be removed.

Chetan: so many revocations? Less revoked! EY → dynamic user connect.

10⁰⁰

Jens: RAT. * Re-neg. discussion in SSL. New RFE.

* communication challenges work: response from all DMM's within 24 hrs. Last test: August 2010.

* Renegotiation: there remain problems with older software. That cannot be fixed anymore.

RFE 5746 new protocol is OK.

Not only a problem if merge is allowed. Always require client → OK.

* No more challenge planned.

10¹⁵.

S/A: Ireland: reviewers. None.

last next: new CP/CPS in progress.

10²⁰

Onni: EUMed Quid Support programme.

→ HIRST CA page online now; Jordan: internal review of CP/CPS.

Egypt will start shortly; Tunisia may be delayed - unsure of status.

Rest of EUMed Quid Supp info from Federico Ruggieri

coffee

11⁴⁰

DFN/Reimer.

AP Classic → profile to go from 1y+1mo → 395 days.
to get old DFN + current TCS.

#38: spaces in SDN: open CA by default does not do that, but Jens has patched it.

ASN.1 + ASN requires space - in sensitivity.

Peer reviewers: Nuno + David G

12⁰⁰

STS (Dawick). intro.

- separate attribute authority and AuthZ. ETD does that. (cf. Papyrus).

Jens:

Pistupa. (Uk). Secure genomics infrastructure.

-> Active Web Relations + Microsoft + STFC.

-> Andrew Grimshaw has STS in GenISIS-2, but in Java.

13⁴⁵

Remco PivN / Security for Web Services, STS & WS-*.
Journal W-Profile Federation, which was looked at in the UK.

↳ Passed resembles browsers a bit and does not cover all cases?

Resume discussion in Prague.

STS vetting of quality - keeping in mind that s/w availability may result in many more STS instances.

probably worthwhile when deployed in conjunction with national W-Profile federations.

14⁰⁰

AA Ops Profile (Dawick).

* Review by DEISA.

-> Interop.

binding to AuthN by other profiles. needed for interop anyway.

16¹⁰

II: AA Ops Guidelines

[see Wiki]

09:30

Tue. 25/1/2011.

Notes: morning. Nuno Dias.

09:35

Belnet update.

see gridra.belnet.be. Online CA. -> no HSM? Now: sever link + USB.

Shlo: why link cert issuance to entitlement to use grid resources?

that's not needed.

check compliance.

in current CP/CPS: "off line"
=> will move CA offline now and use USB transfer

Belnet (entb).

(ACT) → track results and off-line move: Onur + Reimer.
this is update, not self-avoid.

10¹⁷. Approache: DB, ARN → network upgrade. (Voted) 155 Mbps GEPANT
622 community IP.

DN: C-naming? L?

- ARN is national authority for DNS etc.
- DA name form? Why add this component for the DN. complex but ok.
- DNS in SubjAltName. must be added.
- Uses Open CA. latest version.
- acceptance? Revoke if retrail received? will check.

⇒ Review: Eugene + Pawel email 2 wk last call at end of convergence.

10⁵². MPEN, self-audit, Lidija.
list of items ok.

- Reviewers Cosmin + Nelly.

For classic AP update.

- 395 days instead of 1y+1mo
- go to 2048 bit EEC.
(following Mozilla)

395 days
3/16 EEC.

11⁵⁰ Ohansson SABP - HWA85.

Issues: #15: inconsistency on CRL? → no csl.

- : SHA256?! no use. → will change. (see note discuss...)
- : C/dc naming.
- : classic AP CID in EEC.
- : 395 is ok. → unambiguous consistent.

- DFN formally object.

- complete all over email: agreed CRL ~~removal~~ over mail
after reviewer iteration + 2 wk last call.

12⁴⁰ Scott Rea TAB update.

Dango to be replaced for org. Still open. (will be days)

13⁰⁰

Scott. PIEP update.

- * Jim can proceed, since he consider that within the guidelines.
- * the guidelines can do with upgrade of #4.
- * discuss new text draft for Taipei
- * agreed will review specifics.
- * add unique buy ownership.
- + auditability.
- identify cuts with OIO / ISEP on generation type.

14⁴⁵

Down-time notifications. / Christos

- * any length of scheduled downtime (1 wk before)
- * when down unexpected try to add.
- * register yourself within 1 mo.
- RP's: - use RSS feed
- import in dashboards.

15⁰⁰ Jens:

Slide #9 → "The Pipeline dilemma"

17⁰⁰

* self-audit in video conf and in plenary have reviewers report.
2-day (1/2 - 1 - 1/2)

keep 3/yr, only consider fewer if video actually works.
* + keep in mind the 3/yr also aids in getting people meet the 1/yr attendance requirement.

try video once, with testing slot before.

Prague: wed. luncheon → friday. noon or end.
Marrakech. full mon morning → wed lunch.
Ljubljana: Januery.

17³⁰

CAOPS - NG (Sens).

- minutes from QRF30 missing
- RPDNC: needs reply to PC.

- HLEP → move to IETF / EUgrid PMA.
still needs cleanup.

QRF31: only one session in Taipei.
also All Hands.

17⁴⁰

Prague: whether should be OI.

exact venue still to be determined

09⁴⁶

Eugene. Self audit.

complete. → end status is now completed.

DK:

DUS: - surfed web i/f.

- or want ~ 6 mo

- ask.

- or rubinet + protocol.

} generally all OI.
no hurry for v6.

10¹⁵ DK.

HICS 1.2.

The VAP/PMA v1.2 version contains all EUGP agreed suggestions.

[some change PKP guidelines add also OI or ISEP into cuts.

but no specific version.]

Not voting on Mike's comments.

Minor style changes OK.

11⁰⁰

Approved 1-2 as is. ✓ congrats to Mike. (Mike joins.)
closing + Narrakesh. Dates are 12-14 Sept. 23rd.
